## ECOLYTE NANO SPRAYER + MULTI - SURFACE DISINFECTANT

only needs  
**05 - 10 sec**  
to disinfect the surface of contact

### Why We Recommend ECOLYTE NANO SPRAYER + MULTI SURFACE DISINFECTANT ?

With the recent surge of contaminations, Its becomes mandatory for every one to disinfect houses, premises and surroundings area in order to tackle viruses, bacteria, and mold etc. Thanks to the technology, we today have many devices like foggers, nano sprayers, humidifiers & more which make our life easier. However, The challenge is to be able to find a proper disinfecting & sanitizing liquid which will have no side effects on fabrics (curtains, carpets, sofa... etc) and human skin. Unfortunately many still use foggers or sprayers with bleach liquid or alcohol or similar chemical product which are toxic, irritant, hazardous, not natural, not safe and leads to discoloration of clothes and skin's blemish. Instead, our company Ecolyte+ has specially developed ECOLYTE MULTI-SURFACE DISINFECTANT which is made from Pure Electrolyzed Water and which has no side effects on human skin, nor on pets (even on aquatic life), nor on fabrics and nor on our environment. This give you the confidence to protect your own life, also relatives and colleagues life's without any compromise or doubt.

### Is there any risk of using Ecolyte Multi-Surface on clothes, skin & surroundings?

We only offer the best quality products that are safe for anyone to use. All our disinfectants are 100% Natural, non-toxic, non-corrosive, and environmental friendly. Our product ECOLYTE MULTI-SURFACE DISINFECTANT is safe for people, plants, pets and in use all professional and domestic environments. Studies (from the World Health Organization, The United States FDA & more) have demonstrated that continues use of Pure Electrolyzed Water (HOCl) steadily reduce the "bounce back" rate of contamination. This leads to a considerable reducing level of risk.

### How Do I Use it?

Ecolyte Nano Sprayer is a great device for disinfecting a whole house or workspace without the need to find power outlets. In fact, it can disinfect an entire room in two to five minutes. To operate it, users just need to add ECOLYTE MULTI-SURFACE DISINFECTANT in the refill bottle and spray all the high-touch surfaces, indoors or outdoors. Try it and you will enjoy

The Healthy way to keep your food free of Germs, Spray away dirt's, maximize the freshness, remove odors, preserve the nutrients and extends the shelf life.

**100%**  
**Natural Solution**  
to Sanitize and Disinfect  
Meat & Seafood by killing  
all types of pathogens  
i.e. Virus, Fungi, Bacteria etc.

## ECOLYTE MEAT & SEAFOOD DISINFECTANT

**NEW LAUNCH**

## Why We Should Always Disinfect Our Meat & Seafood?

It is believed that poor evisceration (loosened, tied-off rectum, cut bladder, punctured viscera) and adoption of unhygienic practices may lead to contamination, cleaning with water only allows bacteria to grow, to circulate and is frequently a source of undesirable micro-organisms. **ECOLYTE MEAT & SEAFOOD DISINFECTANT** is a Natural Disinfectant that you can use to safely strip away all harmful germs from your Meat and Seafood.

## How About Fresh Meat & Seafood?

Just Because you buy fresh chicken, meat, fish does not necessarily mean it's free of contaminants and germs. Fresh Meat & Seafood can contain myoglobin and it may lead to contaminations and people with weak immune systems are at a greater risk of contracting Salmonella, Escherichia E. coli, Enterohemorrhagic E. coli, Listeria, Campylobacter etc...

## How Do I Use it?

Spray Several times **ECOLYTE MEAT & SEAFOOD DISINFECTANT** directly on Meat & Seafood and wait for 5-15 seconds. It will act deeply on your Meat & Seafood, providing a more thorough disinfection, this process will remove chemicals, kills germs, kick out odors, maximize the freshness, preserves the nutrients and extends shelf life.

Fruits & Vegetables by killing  
all types of pathogens  
i.e. Virus, Fungi, Bacteria etc.

## **ECOLYTE FRUITS & VEGETABLES DISINFECTANT**

**NEW LAUNCH**

## **Why We Should Always Disinfect Our Fruits & Vegetables?**

Whether the Fruits and Vegetables that you eat is grown on the ground or on trees, contaminants exist in the soil and in the air. Rain-resistant pesticides are used regularly, and often organic farms are located next to factories that use pesticides. Also, approximately 10-15 people can touch your fruits and vegetables just between the farm and the store shelf leaving behind harmful residues and germs. Moreover, even if supermarket and grocery may disinfect the fruits & vegetables before their sale to customers, we still need to disinfect them because there are hundreds of customers who will unfortunately comes with dirty hands (from toilet, transpiration...) and who will leave their own germs on any single fruits and vegetables they touch.

And, since you want to protect your family and want them enjoying the benefits of fresh, organic, healthy food, so lets all of us use effective, non toxic and natural disinfectant. Rinsing alone with water (tap or mineral) is not enough to kills the germs!!!

## **How About Organic Product?**

Just because your product has been organically grown (no pesticides or growth hormones used) doesn't necessarily mean it's free of contaminants . Natural fertilizers can contain harmful pollutants. Wind-carried chemicals drift over from non-organic farms, and there is still people-handling residue from the farm to the store.

## **How Do I Use It?**

Spray several times **ECOLYTE FRUITS & VEGETABLES DISINFECTANT** directly on clean fruits & vegetables and wait for 5-15 seconds. Your food is ready to eat. This process will remove chemicals, kill germs (Bacteria) and maximize the freshness.

## **ECOLYTE Multi-Surface Disinfectant**

### **Why We Should Always Disinfect Our Surfaces?**

Don't assume that your surfaces are germs free, just because they look clean. Bacteria like Many bacteria & viruses can last on kitchen surfaces for up to 24 hour and E.coli can last for up to 24 hours. Stay protected from germs with **ECOLYTE MULTI-SURFACE DISINFECTANT** which contains Pure Electrolyzed water that is effective against germs, bacteria, viruses, mold, etc. This disinfectant is great for disinfecting and sanitizing: Baby toys and accessories, baby feeding chairs, air conditioner window, counter top, toilet area, kitchen area, gym equipment, floors, dustbin, doorknobs, automobile steering/gear, mobile, computers, and any other common indoor and outdoor touch points.

### **Do It Have Any Issues With Surfaces Or Human Bodies?**

We use 100% Electrolyzed Water (HOCL) with a neutral PH, which we produce in our industry under the supervision of highly professional chemists. **ECOLYTE MULTI-SURFACE DISINFECTANT** is completely safe for any kind of surface and even safe for pets, kids, senior citizens and pregnant women.

### **How Do I Use It?**

All you need to do is just spray or use it on the desired surface/floor/touch points you want to disinfect, then sweep the excess droplets with a towel. Alternatively, you can directly spray or put it on a towel and sweep the desired surface to be sanitize and disinfect.

### COMPARISON CHART OF DISINFECTANTS

	BLEACH (SODIUM) (HYPOCHLORITE)	HYDROGEN PEROXIDE (H <sub>2</sub> O <sub>2</sub> )	QUATERNARY AMMONIUM COMPOUNDS	ALCOHOL (ISOPROPYL / ETHYL)	PHENOL	OZONE	ECOLYTE
<b>PRODUCT DESCRIPTION</b>	Chlorine bleach at a 5.25% dilution	Hydrogen peroxide in synergy with a blend of commonly used ingredients	Range of products that use "quats" as the active ingredients	Composed of 60-95% alcohol, usually in the form of ethanol isopropanol etc	Usually an aerosol product Not intended for use as an air freshener	Composed of Ozone (O <sub>3</sub> ) which is an unstable form of oxygen and is highly reactive.	Composed of Electrolyzed Water HOCL, which is prepared in a complete natural way
<b>SAFETY &amp; PRECAUTION</b>	PPE Required. Corrosive to eyes and skin, and a respiratory irritant.	Slight Precautions Required	Precautions Required	Controlled Measure Required	Precautions Required Not to be used near babies, small children	Precautions Required as it is very reactive and corrosive Can damage Lungs	Highly Safe & No Precautions Required
<b>EFFECTIVENESS</b>	Effective in killing bacteria, fungi and viruses, including influenza virus	Effective against a broad spectrum of microbes including MRSA and H1N1	Effective against a broad spectrum of microbes including MRSA and H1N1	Effective against a broad spectrum of microbes (bacteria Virus etc)	Effective against a broad spectrum of microbes including MRSA and H1N1	More effective than chlorine in destroying viruses and bacteria	Strongly effective, Kills 99.995% Germs Bacteria, Fungi, Spores, Viruses i.e. Ebola, Corona Virus etc.
<b>TOXICITY</b>	Highly toxic. May damage carpets, clothes and other fibers when used in higher concentrations	Slightly toxic	Toxic & May cause asthma	Inhalation of high concentration can lead respiratory irritation	Toxicant to cardiovascular neurological, skin and corrosive to eyes	Decompose Rapidly, extremely irritating and possibly toxic	Completely Natural & No Side effects with zero toxicity
<b>ENVIRONMENTAL ISSUES</b>	Toxic to aquatic organisms	Concentrated H <sub>2</sub> O <sub>2</sub> is Toxic to aquatic organisms	Very toxic to aquatic life	Toxic to aquatic organisms	Toxic to aquatic organisms	Concentrated O <sub>3</sub> is Harmful to aquatic organisms	No Hazardous effect on Marine animals
<b>DWELL TIME</b>	Approximately 5-10 minute dwell time	Generally, 1-10 minute dwell time	Normally 10 minutes dwell time	Up to 5 minutes dwell time	About 10 minutes dwell time	Nearly 10 minutes dwell time	Require 5-30 seconds to kill all types of pathogens
<b>ADVANTAGES</b>	Easy to purchase	Non-corrosive in diluted form	Readily available	Readily available	Readily available	Remove unpleasant odors and airborne chemicals effectively	Easy to purchase, non corrosive when PH is neutral
<b>DISADVANTAGES</b>	Mixing with ammonia create poisonous gas	Rinsing is required, where direct skin or oral contact can occur	Affect indoor air quality and thorough rinsing required	Flammable, reacts with oxidizers and inorganic acid	Not for use on food and may damage floor finishes and other surfaces	Highly unstable, can damage lungs and skin	No adverse effect reported
<b>COST</b>	Slightly Expensive	Slightly Expensive	Expensive	Expensive	Expensive	Highly Expensive	Extremely Low cost
